EXPERIENCE

Fleye

Porto Alegre - RS, Brazil

FullStack Developer

Sep '23 — Present

- Maintenance and development of new features for projects using React for Web and React Native for Mobile, with Redux Toolkit and Native Base.
- Ensured high-quality feature delivery through thorough testing.
- Managed Back-end feature development and maintenance using Nest.js.

DinoCode Technologies

Cachoeirinha - RS, Brazil

Chief Executive Officer and Director of Technology

Aug '22 — May '23

- Responsible for selecting the entire company development stack.
- Mentoring team members with technical knowledge and best practices.
- Conducted project estimations and organized sprints using SCRUM methodologies.

CWI Software

Cachoeirinha - RS, Brazil

Senior Front-end Developer

Mar '22 — Jan '23

- Worked on maintaining and developing all parts related to products on the mobile and web app of the client Grupo Pão de Açúcar, using Next.js and React Native.

Wine.com.br

Vitória - ES, Brazil

Mid/Senior Software Engineer

Mar '20 — Jan '22

- Worked on the Wineverso project for the mobile app and worked in conjunction with the QA team to ship the feature.
- Worked on the Express Delivery and Delivery Tracking features for the mobile app.
- Refactored the legacy e-commerce checkout with another developer for the mobile app.
- Worked on the Wine Mexico project, an important project and milestone for the company, developing the BFF (Back-end for Front-end) for the mobile app, and integrating specific use-cases of the Shopify platform to work on the existing mobile app, using Node.js and GraphQL.

Globalsys Soluções de TI

Vila Velha - ES, Brazil

Mid React Native Engineer

Jan '20 — Jun '21

- Worked as a contractor on Wine.com.br developing the mobile app with React Native with the Wine team.

9glabs

Vitória - ES, Brazil

Mid React Native Engineer

May '19 — Jan '20

- Developed multi platform applications with React Native and Redux.
- Established the mobile stack for applications.
- Helped mentor new members and always studying solutions for a fast paced development.

Zaïtt

Vitória - ES, Brazil

Junior React Native Engineer

Jan '18 — Apr '19

- Studied and used technologies such as: Redux, Redux Sagas, Fastlane, Codepush in the application development.
- Developed 3 new versions of the mobile app used to enter the company stores using React Native, 2 of those which were released in Production.

EDUCATION

UNIFAE - Centro Universitário das Faculdades Associadas de Ensino

São João da Boa Vista - SP, Brazil

Bachelor's Degree in Software Engineering

Jan '14 — Dec '17

- Developed an application to earn internship hours, using PHP with Yii2 Framework and Bootstrap for styling. The application was developed to help students do a vocational test.
- Developed for the Final Papers project a proof of concept of the application, using Ionic, Angular and JavaScript. The application was a geolocation restricted chat app, that only works on the defined area, and stops working after exiting the area, to avoid communications outside of work / school.

PROJECTS

Negotiation 7.0 App

Sep '19 — Sep '23

- Developed first at 9glabs, then after that worked as freelance on maintaining the project.
- Maintenance as per client requirements, release management and testing.
- Revamped the old codebase made in React Native, migrating to Expo and converting old libraries to new ones.
- Integrated EAS Build and Submit for the app releases.
